Hiring Manager
[Company Name] — Full Stack Developer

Dear Hiring Manager,

I am writing to apply for a Full Stack Developer role. With 4+ years shipping production software across the stack, I build polished React/Next.js frontends and reliable Node.js, NestJS, and PostgreSQL backends — including auth, APIs, databases, and deployment.

At Zoftcares Technologies, I lead delivery on Stavoya, a multi-tenant platform with 5 modules and 4 role-based portals. That work spans reusable UI architecture, REST API integration, state management with Redux Toolkit and React Query, and backend contributions in Node.js/Express with PostgreSQL.

I also own full product delivery end to end. CertiFlow and English Bell are production monorepos with JWT auth, RBAC dashboards, NestJS APIs, Prisma/PostgreSQL, and deploys on Vercel, Render, and Neon. I care about quality through testing, code reviews, accessibility, and CI/CD.

I would welcome the chance to bring that full-stack ownership to your team. Thank you for your time and consideration — I would be glad to discuss how I can contribute.

Sincerely,

Mohammed Bishir K
Full Stack Developer
