Mohammed Bishir K

Full Stack Developer | React.js · Next.js · TypeScript · Node.js · NestJS · PostgreSQL
mohammedbishirk@gmail.com | +91 8593067862 | Kerala, India | LinkedIn | Portfolio

PROFESSIONAL SUMMARY

Full Stack Developer with 4+ years building end-to-end web products — from responsive React/Next.js interfaces to Node.js, NestJS, and PostgreSQL backends. Led development on a multi-tenant enterprise platform with 5 modules and 4 role-based portals, and shipped production systems with JWT auth, REST APIs, RBAC, testing, and CI/CD on Vercel, Render, and Neon.

TECHNICAL SKILLS

Core Frontend: React JS, React Hooks, JavaScript (ES6+), TypeScript, HTML5, CSS3, Next.js (SSR), Responsive web development
State Management & APIs: Redux Toolkit, Redux, Context API, Zustand, RTK Query, React Query, RESTful API integration, Axios, JWT authentication
UI Components: Reusable component libraries, Component-based architecture, Material UI (MUI), Ant Design, Shadcn UI, Tailwind CSS, Bootstrap
Performance & Quality: Web performance optimization, Profiling, Memoization, Code splitting, Cross-browser compatibility, Accessibility standards, Jest, React Testing Library, Debugging
Backend & Databases: Node.js, Express.js, NestJS, REST API design, PostgreSQL, MySQL, MongoDB, RBAC, Microservices environments
DevOps & Workflow: Git, GitHub, CI/CD pipelines, Vite, Webpack, AWS, Vercel, Render, Linux, Agile/Scrum

PROFESSIONAL EXPERIENCE

Software Engineer, Zoftcares Technologies Jul 2022 — Present

- Lead full-stack delivery on a multi-tenant enterprise platform (Stavoya) using React.js, Next.js, and TypeScript across 5 modules and 4 role-based portals.
- Build responsive, accessible UIs and reusable component libraries that power dashboards, booking workflows, and admin tools.
- Design and integrate REST APIs for authentication, bookings, payments, and real-time availability with predictable client–server data flows.
- Manage application state with Redux Toolkit, Zustand, Context API, RTK Query, and React Query; improve performance with SSR, code splitting, memoization, and profiling.
- Build backend services with Node.js, Express.js, and NestJS, including PostgreSQL schema design, validation, RBAC, and production API contracts.
- Write unit and integration tests with Jest and React Testing Library, debug production issues, and support deployments with Git, GitHub, and CI/CD workflows.
- Take part in code reviews and Agile/Scrum ceremonies, collaborating across frontend, backend, and stakeholders to ship reliable features.

KEY PROJECTS

CertiFlow – Digital Certificate Platform | *Next.js, React, TypeScript, NestJS, Prisma, PostgreSQL, Tailwind*

- Built and shipped a full-stack multi-tenant platform with JWT auth, role-based admin dashboards, a WYSIWYG certificate designer with PDF generation and public QR verification. Delivered as a pnpm monorepo on Vercel, Render and Neon.

English Bell – Institute Management System | *Next.js, React, TypeScript, NestJS, Prisma, PostgreSQL, Tailwind, TanStack Query*

- Delivered a full-stack institute platform with JWT auth, role-based Super Admin / Admin / Reception portals, enquiry-to-fee workflows, CSV import, reports, and production deploy on Vercel, Render and Neon.

Stavoya – Multi-Tenant Room Booking Platform | *Next.js, React, TypeScript, Redux, Context API, Tailwind, Node.js*

- Built reusable interfaces and RBAC-driven dashboards across 5 modules, with SSR for the customer portal and REST integrations for authentication, bookings, payments, and real-time availability.

SAFTA-CMS – Backend for SAFTA Website | *Node.js, Express.js, PostgreSQL, Knex.js*

- Built REST APIs with authentication, RBAC, validation and error handling, plus PostgreSQL schema design and Knex.js migrations.

AITIQS – Ticketing System Platform | *Next.js, TypeScript, Tailwind CSS, RTK Query*

- Built dynamic, interactive UI components and responsive layouts; used RTK Query for real-time updates and streamlined data flow.

SAFTA – Agri-Food Digital Platform, Saudi Arabia | *React, TypeScript, RTK Query, Material UI*

-

Developed scalable, responsive interfaces, using RTK Query for API integration, caching and data synchronization and MUI for a reusable component system.

SGMB-CMS – Content Management System, Sharjah Government | *React, JavaScript*

- Built administrative dashboards and content workflows with authentication and role-based access control, integrating frontend and backend services.

SGMB – Event Platform, Sharjah Government | *React, JavaScript*

- Developed responsive, accessible event interfaces with reusable components, optimized for cross-browser compatibility and performance.

EDUCATION

Bachelor of Science (B.Sc) in Computer Science, Calicut University, Malappuram, Kerala Apr 2019 — Apr 2022

LANGUAGES

English (Fluent), Malayalam (Native)
